## NANO HYDRO CUTTER

### Changes the way you think of straight cutters

LSAB has developed a solution for straight cutting with a technology that improves the planed surface and reduces impact in the machine. The NANO-cutter from LSAB is a high-end tool for demanding productions with focus on top quality.

- Gives a perfect surface without shadows or cutter marks.
- Eliminates tensions in the spindle when pressurizing.
- Reduces, or in most cases eliminates vibrations.
- Provides relieve to bearings and supports in the machine.
- Longer running times than other straight cutters on the market.
- Add LSAB Galaxy Pro-knives for extremely long running times, faster feeding and the best possible surface on the market.
- Developed and produced by LSAB in Sweden.
