

SUPREME HYDRO

The supreme solution from LSAB

LSAB has developed Supreme, a revolutionary tool system, extremely accurate and filed for patent!

Supreme benefits:

- The tool is designed for stability and exact fixation.
- Small initial investment and suitable for high-speed production at a low cost.
- Bodies from our standard range are available from stock. Profiled knives have very short delivery times.
- Knives are grinded in the profile.
- New knives can easily be mounted in the body, making the tool flexible and cost-effective. The need for a saw-shop is reduced.
- Knives are delivered in Galax Pro-quality for long running times and an improved surface.
- Developed and produced by LSAB in Sweden.
