

# ENVIRONMENTAL & QUALITY POLICY

## CUTTING EXCELLENCE

We offer tool solutions that focus on our customers' profitability. Our offering also includes training, process optimization, and services such as tool sharpening. Our customers are primarily in the wood processing industry in Northern Europe.

This environmental and quality policy outlines the overall guidelines we have established for our quality and environmental work.

## OUR QUALITY WORK

Our customers should be satisfied with us by providing goods on time, in the right place, and with promised quality. We should be responsive to customer requests and strive to offer technical solutions tailored to each customer's specific needs.

## OUR ENVIRONMENTAL WORK – FOR A SUSTAINABLE DEVELOPMENT

We shall protect the environment by reducing impact through:

- Yearly decreasing our energy consumption and CO2 emissions.
- Decrease our environmental impact by a responsible chemical and waste handling.

In all parts of the company's activities, we shall strive to reduce the impact on the environment as much as possible, without compromising on quality or economic issues.

We shall work with continuous improvements, reduce our internal and external environmental impact, and ensure that laws and regulations are properly followed.
